RAISING THE BAR — IN SUSTAINABILITY

Reusable • Premium • Silicone Barware

gosi®

Let's have a

DRYNK™
by GoSili

Since 2007 GoSili's mission has been to create reusable, non toxic, silicone drinkware and provide an alternative choice from the excessive waste of single use plastic. The Drynk™ line offers a premium outdoor solution for hospitality, allowing uncompromising distinction for their guests by the pool, beach or deck, while achieving sustainable goals.

Drynk™ Silicone Tips

- Commercial dishwasher safe
- * Durable and unbreakable
- * Recyclable; we take it back and close the loop!

Goodbye Plastic

Silicone vs. Plastic

- Unlike plastic, silicone does not break down into toxic, micro pieces
- Silicone sits at the top of the Zero Waste Hierarchy — rethink, reduce, reuse
- Single use plastic is rarely recycled and floods water ways and landfills
- Legislation is banning the use of single use plastic across multiple industries

“A beautiful cocktail should never see the inside of a disposable, plastic cup.”

Giuliana Schwab—Design Director DRYNK™

Pool Side Beach Deck

Drynk™ Benefits

- Premium, European grade silicone
- Rigid, unbreakable & reusable
- Industrial dishwasher safe
- Recyclable (we take it back)

NON TOXIC

PATENTED
STAINLESS
STEEL RIM

NON-SLIP
TEXTURE
FOR GRIP

The rise of Green Hospitality

A smart choice for the future

- Meeting consumer demand
- Enhancing brand reputation
- Fostering innovation & collaboration
- Preserving natural resources
- Driving operational efficiency

**Hotel Suppliers*

**“Unfortunately the global hotel industry generates
150 million tons of single-use plastic each year.”**

**Sustainable Hotel News*

DRYINK™ Bar Cart

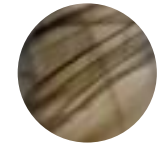

10oz Short Stack

16oz Large Stack

8oz Martini

Onyx

Alabaster

10oz Rocks

1.5oz Shot

6oz Coupe

10oz HiBall

Minimum order 100 units per style and color way. Custom colors available (minimum 1000 units.)

The Numbers Tell The Story

A hypothetical comparison

- Daily quantity resets for plastic cups
- Throwing plastic and money away
- Upfront investment for reusable silicone
- Ultimate savings in first month
- No waste and money saved

DISPOSABLE PLASTIC CUPS

\$0.05/EACH (ESTIMATED COST)

1k / day = \$50

30k / month = \$1500

360k / year = \$18000

REUSABLE SILICONE CUPS

\$7.00/EACH (AVERAGE COST)

1k / day = \$7000

1k / month = \$7000

1k / year = \$7000

1 to 1 for cost comparison. Silicone cups would be washed and reused daily liked glassware, resulting in less quantity needed upfront.

A person wearing a light-colored t-shirt and a wide-brimmed hat is sitting on a wooden deck, looking out over a tropical beach. The scene is bathed in the warm, golden light of a sunset. Palm trees are silhouetted against the sky, and a beach umbrella is visible in the distance. The water of the ocean is calm, reflecting the light. The person's hands are resting on the wooden planks of the deck.

Fits into the Existing System

Just like glassware

- Rinse and clean with commercial dishwashing
- Freezer safe for that extra chill
- Stackable cup designs offer more storage space
- Alternative cup designs allow premier mixologists to get creative

A woman wearing a large straw hat and a bikini is relaxing on a white lounge chair on a beach. She is holding a cocktail glass with an orange slice. The background shows a clear blue sky and the ocean. The text "HAVE A DRYNK ON US" is overlaid on the image. The word "DRYNK" is in a large, outlined font, and "TM" is a small superscript to its right. "by Q&B" is written in a smaller font below the "K" in "DRYNK".
