

NEOZ®

Product Collection  
2025/2026

## We design lights for people who create experiences

For NEOZ, light does so much more than just provide illumination, and it's why we design lights for people who design experiences. We understand the role light plays in setting a captivating ambience, enhancing aesthetics, and setting the mood. On a more practical level, it needs to complement its surroundings, be easy to use, and ensure reliable functionality. It is this understanding that drives us to design cordless lamps specifically tailored to meet the unique requirements of hospitality industries such as hotels and restaurants.

Our true passion lies not just in lamp design, but in lighting the way towards unforgettable experiences. NEOZ has been in the industry for over four decades, and over this time we have continuously evolved and embraced innovation in order to deliver products that seamlessly blend beauty, usability and sustainability. We firmly believe in the transformative power of design, and our diverse, award-winning in-house design team strives to consistently exceed expectations and make a lasting impact on every space that our lamps illuminate.

*Jon Hemming*

Jon Hemming  
Chief Executive Officer

## Our origin

It all started in 1995. NEOZ founder and industrial designer Peter Ellis was approached to work on the lighting design for Penfold Wine's Magill Estate restaurant in the Adelaide Hills with Sydney architects Allen Jack+Cottier.

He was tasked with designing an electric lamp with no cord, allowing tables to be moved around the room. As there were no off-the-shelf battery systems available, he designed his own precisely to meet his requirements. The result was the Magill cordless table lamp, and the first cordless lamp was born.

NEOZ has a rich history of innovation in lighting design. In the 1990s, our Lightrail and Lightwire track systems revolutionised the industry, and since then, we've earned numerous prestigious design awards and created influential designs that have made a mark on the history of hospitality lighting.

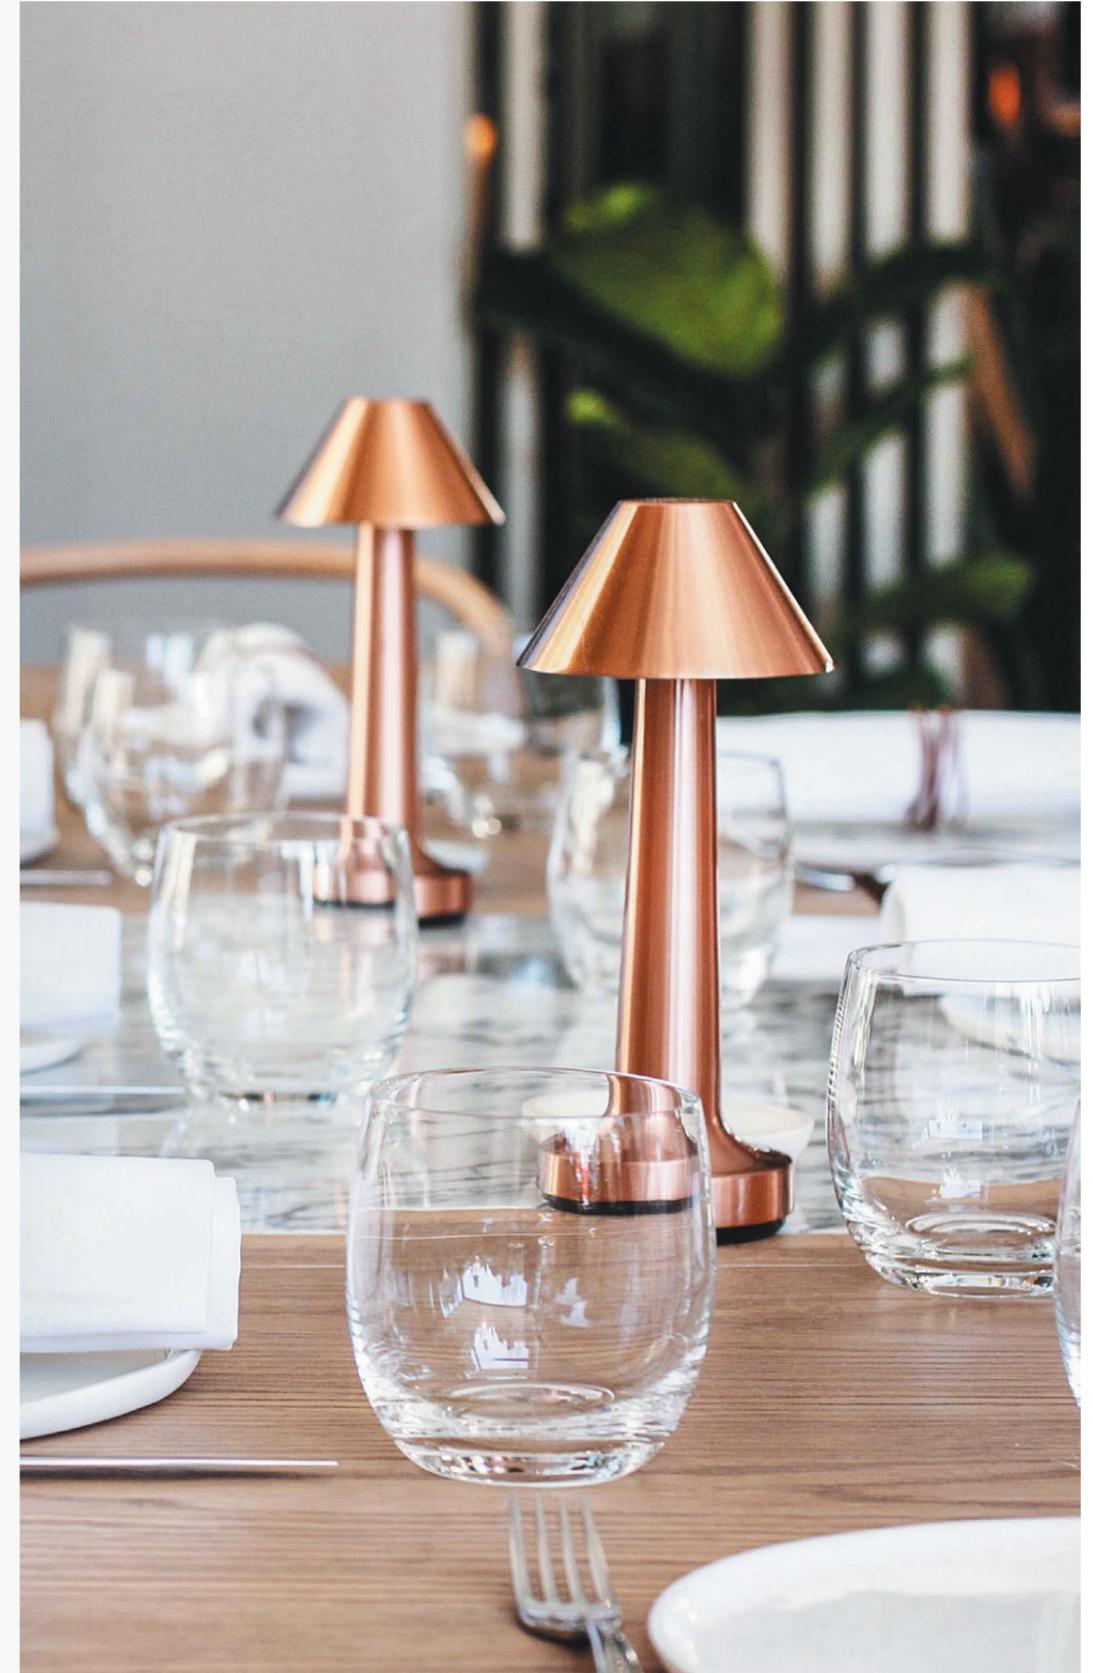

# Hospitality is our heritage

With over 40 years in the hospitality industry, NEOZ has developed a strong expertise in lighting design. Since day one, our focus has been on restaurant dining, driving us to become industry pioneers—continuously innovating and evolving in the field.

Along the way, we have designed lighting systems for some of the most iconic restaurants, bars, cafes, and hotel locations worldwide. From The Ritz in London to the Sydney Opera House, our lighting is used in dozens of renowned restaurants, hotels, bars, and private clubs consistently ranked among the world's best.

We have always understood the importance of light quality in hospitality. We design forms, choose materials, and calibrate light in ways that accentuate the way people look, dramatically lighting their beautiful meals and the décor around them to stunning effect.

It's no exaggeration to say that every detail of our lighting systems has been designed with a focus on the needs of the hospitality industry.

## Designed and made in Australia

We offer the hospitality world Australian-made quality they can rely on. All NEOZ products are proudly designed and manufactured in Australia, ensuring that our lamps are built with a focus on the highest quality standards — elegance, reliability, and sustainability.

The NEOZ Cordless Lamp range has received multiple Australian Design Awards, as well as the Red Dot Design Award and other notable industry design awards.

### MULTI AWARD-WINNING

Our modular lighting systems have received numerous awards from industry leaders for product innovation and design excellence.

### 5 YEAR WARRANTY

All NEOZ Cordless Lamps are covered by our industry-leading five-year warranty and supported by dedicated customer service and after-sales support team.

### MODULAR & SERVICEABLE

We have always designed our lights around modular principles. This offers maximum flexibility, serviceability, and customisation throughout the product's life.

### INTERNATIONAL SERVICES

With clients from over 100 countries worldwide, our experienced team will supply and deliver your order almost anywhere in the world.

### CUSTOMISATION SERVICES

We are passionate about industrial design with purpose. We can work with your team to customize our existing silhouettes or create bespoke pieces to make your lights truly unique.

### EASY CHARGING

Choose from a range of recharging solutions from a single charging base to a recharging station for 48 lamps. Simply dock and charge the lamp, no messy USB cables.

# Piccolo

## Elegantly innovative

To coincide with the launch of the NEOZ N1, we are introducing the all-new Piccolo cordless lamp. Crafted from brushed stainless steel and adorned with a polycarbonate light diffuser, Piccolo captures a sense of playful elegance.

Its IP64 rating ensures resilience against the elements, allowing seamless illumination from the poolside to dining under the stars. Beyond aesthetics, Piccolo uses 75% post-consumer recycled plastic for its internal structure for improved sustainability.

The Piccolo was awarded the 2024 Archiproduct Product Design Awards and the 2024 Sustainability Awards.

Ribbed cylindrical diffuser  
on stainless steel conical body.

155mm x 91mm

# Bellinggen

## Sustainable luxury

The Bellinggen lamp celebrates the beauty of sustainable timber in an organic form. Using Camphor Laurel sourced locally from the Bellinggen Shire, this beautiful hardwood has delicate layers of rich honey colours, a unique, strong grain, and a crisp fragrance from its natural anti-bacterial oils.

We worked with the local community to identify trees of this invasive evergreen species to harvest. The timber is then crafted into the lamp body using sustainable processes by local craftsman Jack Buchanan, a second-generation woodworker. The Bellinggen is finished with a natural satin oil, resulting in a water-repellent and dirt-resistant lamp body. Every piece is unique and celebrates how imperfectly perfect timber is, just as nature intended.

**Bellinggen Spring**  
Hand-made short tapered cotton lampshade.  
230mm x 120mm

**Bellinggen Summer**  
Hand-made empire cotton lampshade.  
275mm x 120mm

**Bellinggen Autumn**  
Hand-blown amber glass lampshade.  
230mm x 116mm

**Bellinggen Winter**  
Hand-blown frosted glass lampshade.  
230mm x 116mm

**Bellinggen Evergreen**  
Hand-blown green glass lampshade.  
230mm x 116mm

# Manhattan

## An homage to Art Deco

Inspired by the art-deco skyscrapers that define iconic cities, the Manhattan collection captures their essence with a sleek, linear and symmetrical design.

With its refined vertical ornamentation, this slim, elegant cordless lamp provides direct downlight and a soft diffused sidelight, perfect for fine dining spaces, bars and alfresco seating. Crafted with CNC-milled solid brass, the Manhattan is polished and lacquered to a sophisticated shine.

Manhattan

Hand-made cotton or pleated silk lampshades on a solid forged brass base.

275mm x 120mm

Manhattan Glass

Hand-blown ribbed lampshade in green, amber or frosted glass on a solid forged brass base.

230mm x 116mm

# Victoria

## Quiet luxury

The Victoria collection is a showcase of understated luxury, made using premium materials that stand the test of time—stylistically and functionally.

Opt for the classic lacquered finish for a long-lasting, deep luster, or choose the “Aged Brass” surface finish, a proprietary rapid aging process with an authentic “living” finish where the surface will continue to evolve over time. For those looking for slightly less quiet luxury, an 18-karat gold-plated finish is sure to impress.

Victoria

Hand-made cotton or pleated silk on solid forged brass, aged brass or 18k gold plated base.

275mm x 120mm

Victoria Glass

Hand-blown ribbed lampshade in green, amber or frosted glass on solid forged brass, aged brass or 18k gold plated base.

230mm x 116mm

# Ritz & Albert

## A true classic

Originally made for The Ritz London, the classical style of the Ritz cordless lamp embraces the period's ambience and understated elegance.

Hot forged from a single ingot of raw brass, the Ritz and the more compact Albert are CNC machined and polished to a deep lustre. The solid brass base is then paired with a handmade lampshade, providing direct downlight and soft diffused sidelight.

Ritz

Hand-made parchment or pleated silk lampshade on a solid forged brass base.

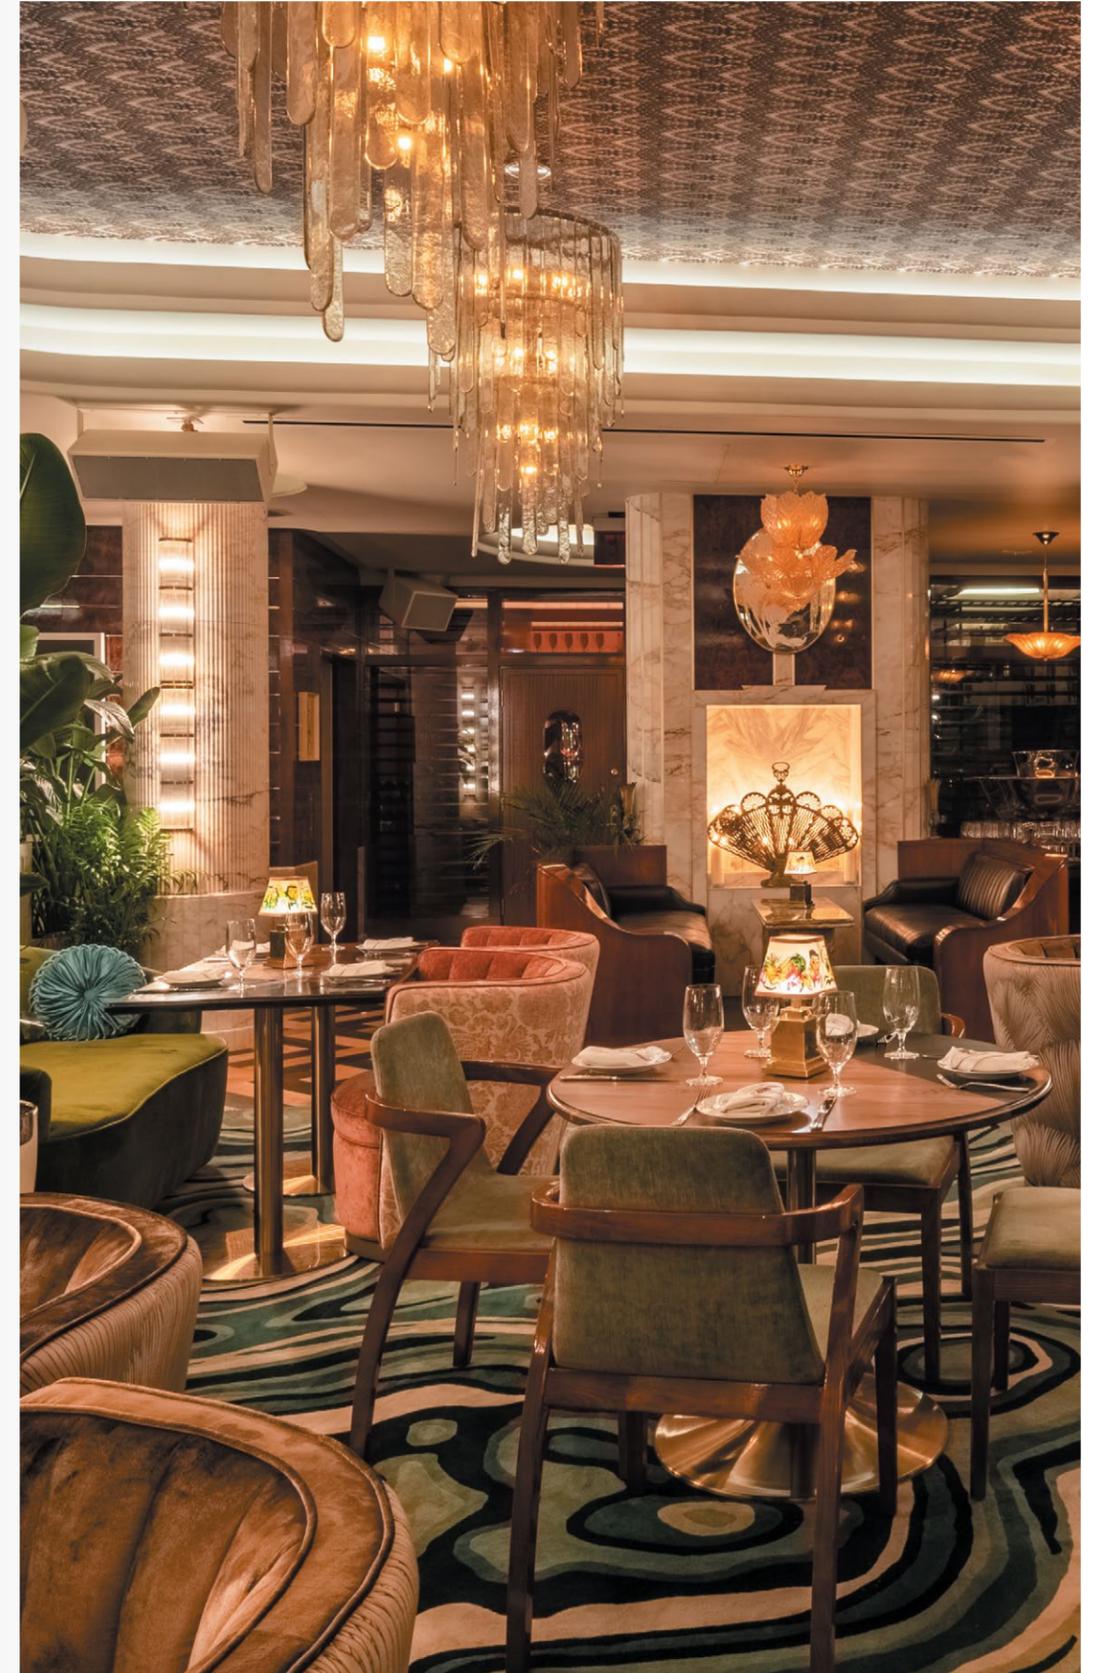

275mm x 130mm

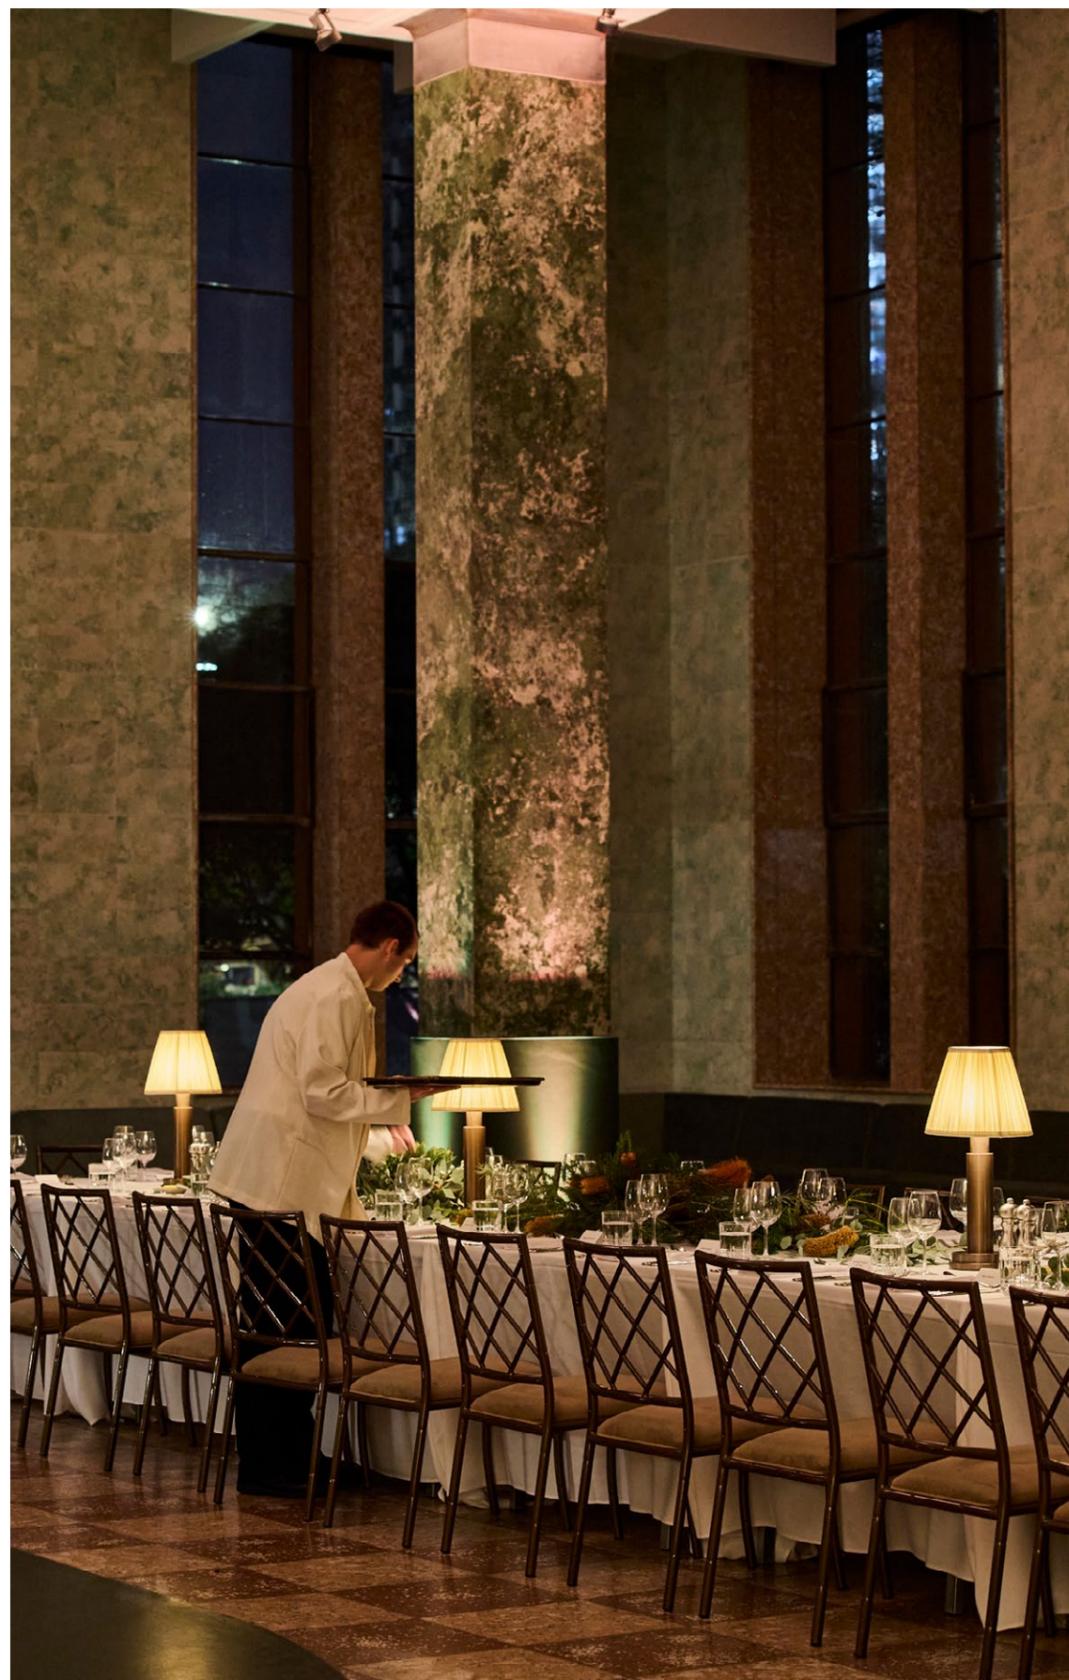

Albert

Hand-made cotton or pleated silk on solid forged brass, aged brass or 18k gold plated base.

275mm x 120mm

# Elizabeth

## A grand entrance

The Elizabeth cordless table lamp builds on the success of NEOZ's popular Victoria design. Offering a larger scale, the goal was to retain the elegance and refinement of the original design while celebrating the opportunity that scale presents.

Elizabeth creates a striking focal point, ideal for entryways, restaurants, and hospitality settings. Crafted in solid brass with a polished finish, Elizabeth stands tall at 56cm and offers a choice of four handcrafted shades and two base finishes.

Hand-made cotton or pleated silk lampshade on solid brass or aged brass base.

560mm x 270mm

# Cooee

## An iconic original

For evidence of NEOZ's commitment to design excellence, look no further than the Cooee lamp range, which secured Gold and Silver awards in the International Design Award (2013) for Outdoor Lighting and Urban Sustainable Design, respectively.

Often imitated but never replicated, the instantly recognisable designs of the Cooee range feature slim, durable metal bodies, with reflectors that provide maximum direct downlight without glare. With minimal reflection, Cooee is ideal for table lighting in rooms with views through glass.

Cooee 1c

Slim metal body with dome reflector.

210mm x 90mm

Cooee 2

Slim metal body with cylindrical opal diffuser.

210mm x 90mm

Cooee 2c

Slim metal body with enclosed diffuser.

210mm x 92mm

Cooee 3

Slim metal body with ribbed conical diffuser.

220mm x 95mm

Cooee 3c

Slim metal body with conical reflector.

220mm x 97mm

Cooee 4

Slim metal body with ribbed cylindrical diffuser.

210mm x 91mm

# Tall Poppy

## Simply outstanding

The Tall Poppy cordless lamp draws inspiration from nature, standing high like a flower soaking up the sunlight. Crafted from durable diecast zinc alloy, it also features a subtle texture that enhances grip and adds a touch of visual interest.

The Tall Poppy was awarded the Good Design Award, IIDA HD Expo Product Design Awards and darc awards (2nd place) in 2017.

Zinc alloy die-cast body, hand-polished before applying electroplating, paint or PVD surface finishes.

208mm x 81mm

# Apex

## A classic redefined

The Apex was designed to celebrate our 25th anniversary and pays tribute to NEOZ's very first cordless lighting launch, the Magill. We maintained the original's pure geometric qualities, creating a compact yet robust product that feels good in your hands - precision-milled from solid brass or aluminium alloy.

The Apex was awarded the GOLD A'Design Award in 2021.

Precision-milled solid brass or aluminium alloy with clear acrylic cylinder.

208mm x 81mm

# Owl

## Inspired by nature

Sleek, adaptable, and designed with functionality, longevity, and purpose in mind. Adapting to an environment is one thing, but we design our products to thrive in their natural habitat—fine restaurants. The Owl collection reflects the same design ethos and technological innovation that is built into every NEOZ lighting system.

The Owl was awarded the Red Dot Design Award in 2008.

Owl 1

Polished metal body with dome reflector.

190mm x 78mm

Owl 2

Polished metal body with cylindrical opal diffuser.

190mm x 90mm

Owl 3

Polished metal body with ribbed conical diffuser.

200mm x 95mm

# Magill & Collins

## Timeless forms

The Magill was the very first NEOZ Cordless Lamp, designed back in 1995 for the Penfolds Magill Estate Winery. Almost 40 years later, its minimalist, clean design, inspired by postmodern architecture, remains just as striking.

The Collins collection was designed in 1999 and is characterised by its tube-shaped opal polymer diffuser and bold yet understated brushed stainless steel finishes.

Magill

Partially frosted acrylic with brushed stainless steel body.

195mm x 100mm

Collins

Opal polymer diffuser with brushed stainless steel base and top.

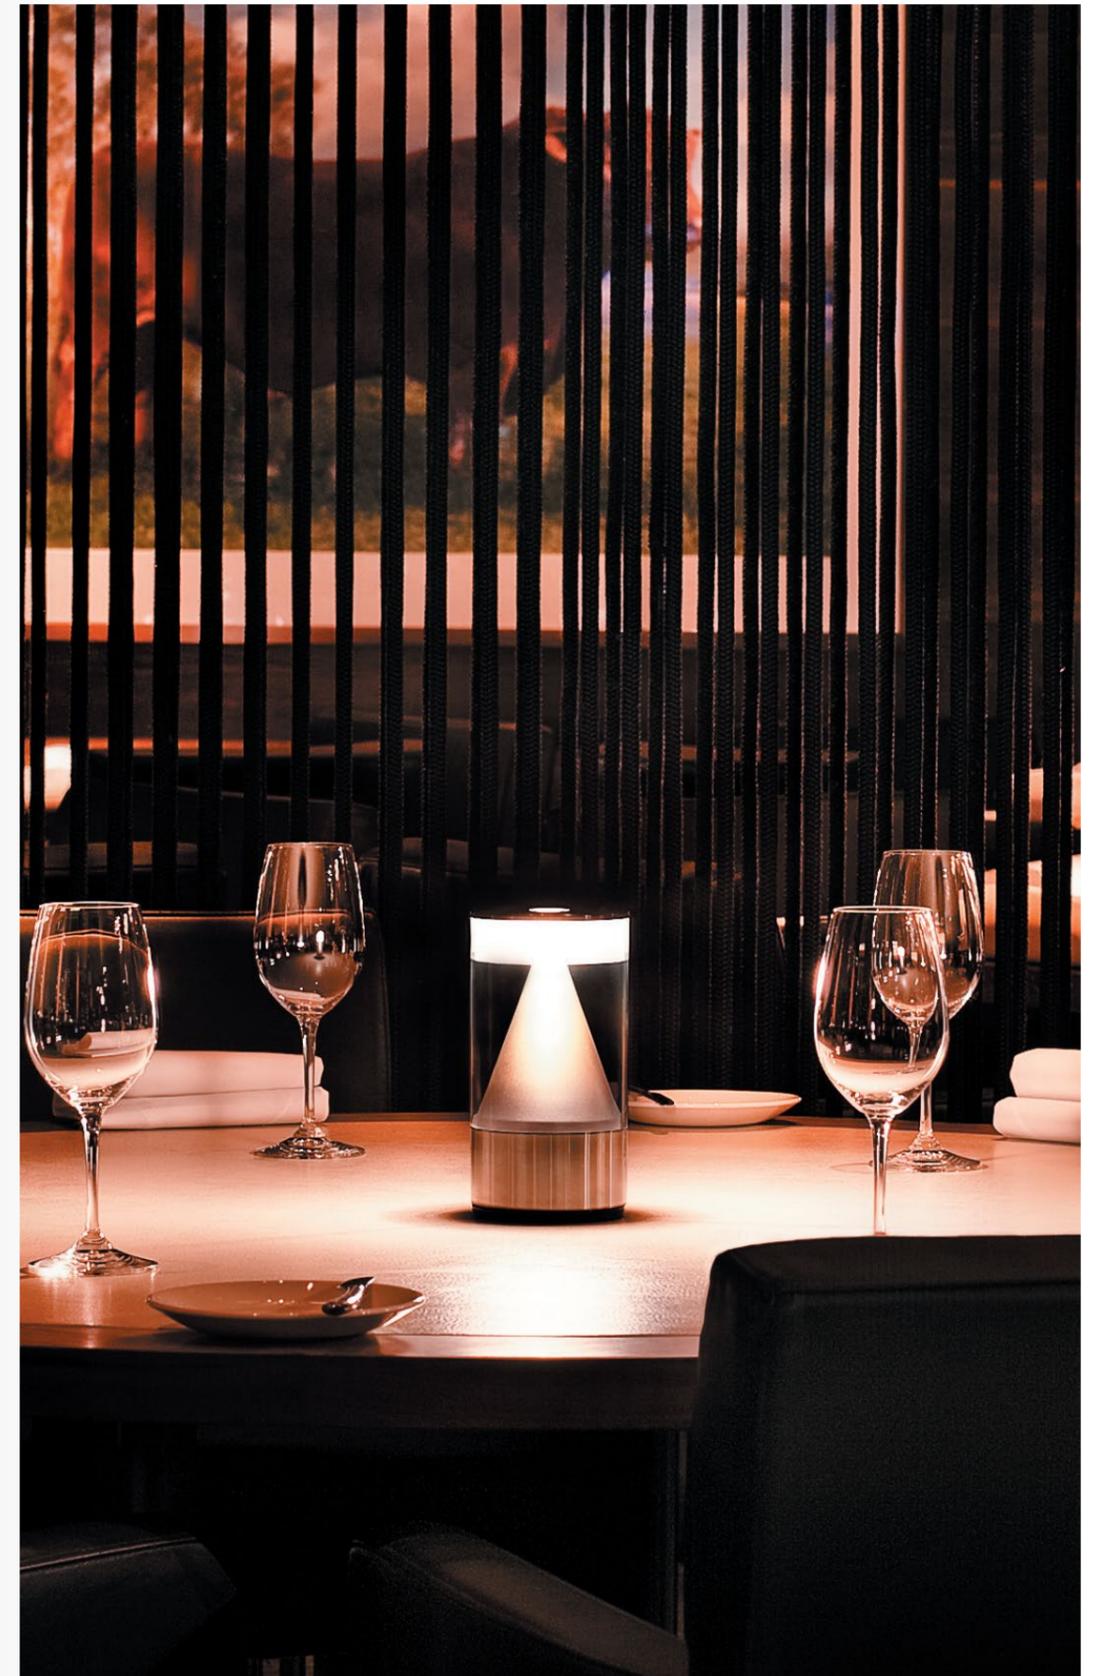

195mm x 100mm

Little Collins

Opal polymer diffuser with brushed stainless steel top.

145mm x 100mm

# Corner Light

## An ode to light and form

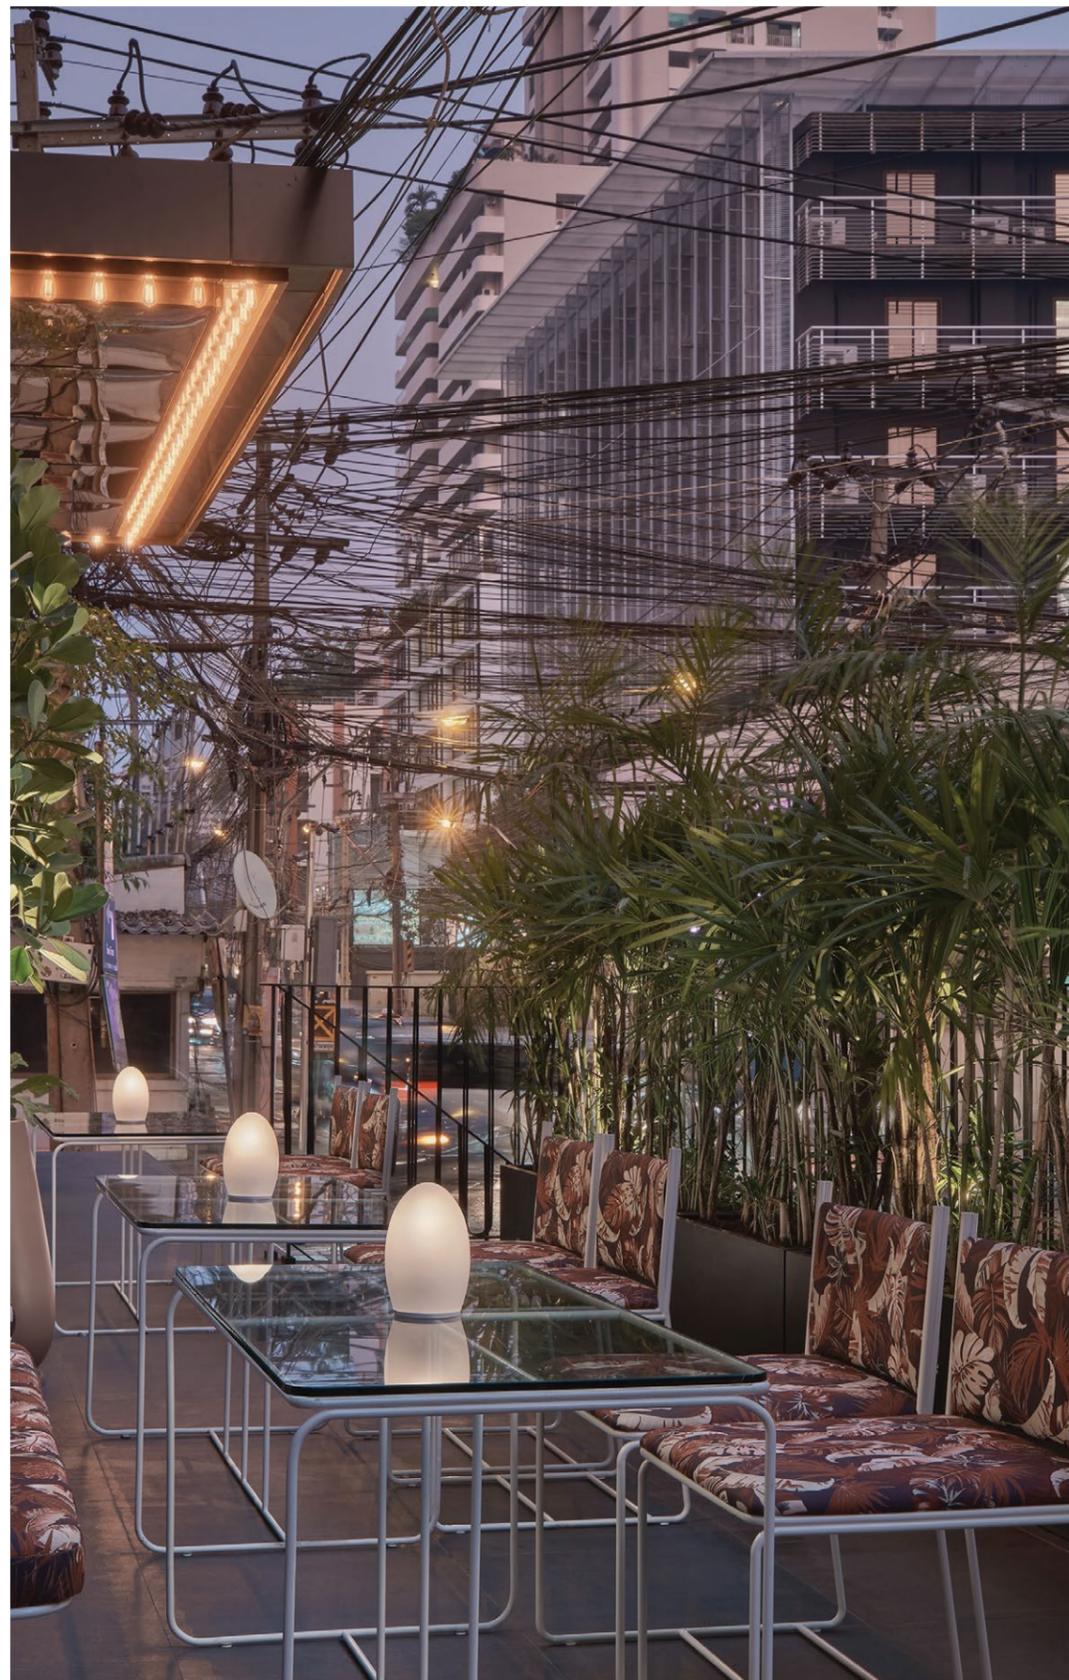

Introducing the Corner Light, a limited-edition cordless table lamp designed by award-winning architectural lighting studio There's Light in collaboration with NEOZ.

Known for their atmospheric and integrated lighting schemes, There's Light has distilled their signature approach into a compact and functional lamp. The handblown glass diffuser is paired with an aged brass base, featuring an authentic 'living' finish that will continue to patina over time.

Corner Light  
Hand-blown frosted glass diffuser  
with aged brass base.  
145mm x 126mm

# Egg & Margarita

## Comfortable outdoors

Some things are well-suited for the alfresco life. As comfortable under the open air as nestled on a dining table, the Egg collection features hand-blown glass diffusers in the classic NEOZ Egg shape, casting a soft glow on any space.

The Margarita collection offers a similarly soft ambience in an asymmetrical form, much like the Sydney Opera House, where the Little Margarita can be found to this day.

**Egg Original**  
Hand-blown frosted glass diffuser.  
180mm x 120mm

**Egg Fritted**  
Hand-blown fritted glass diffuser.  
180mm x 120mm

**Margarita**  
Hand-blown frosted glass diffuser with polished stainless steel base.  
205mm x 100mm

**Little Margarita**  
Hand-blown frosted glass diffuser.  
180mm x 100mm

# Ice

## Essence of ambience

The connection between lighting and the way something is experienced is in our DNA. It needs to feel authentic, comfortable, and have a pleasing presence.

The Ice collection has become a firm favourite among many designers for its pure, minimalistic forms that comfortably complement almost any interior setting. Its frosted glass diffuser provides omnidirectional light, suitable for both indoor and outdoor use.

### Ice Square

Pressed frosted glass diffuser.

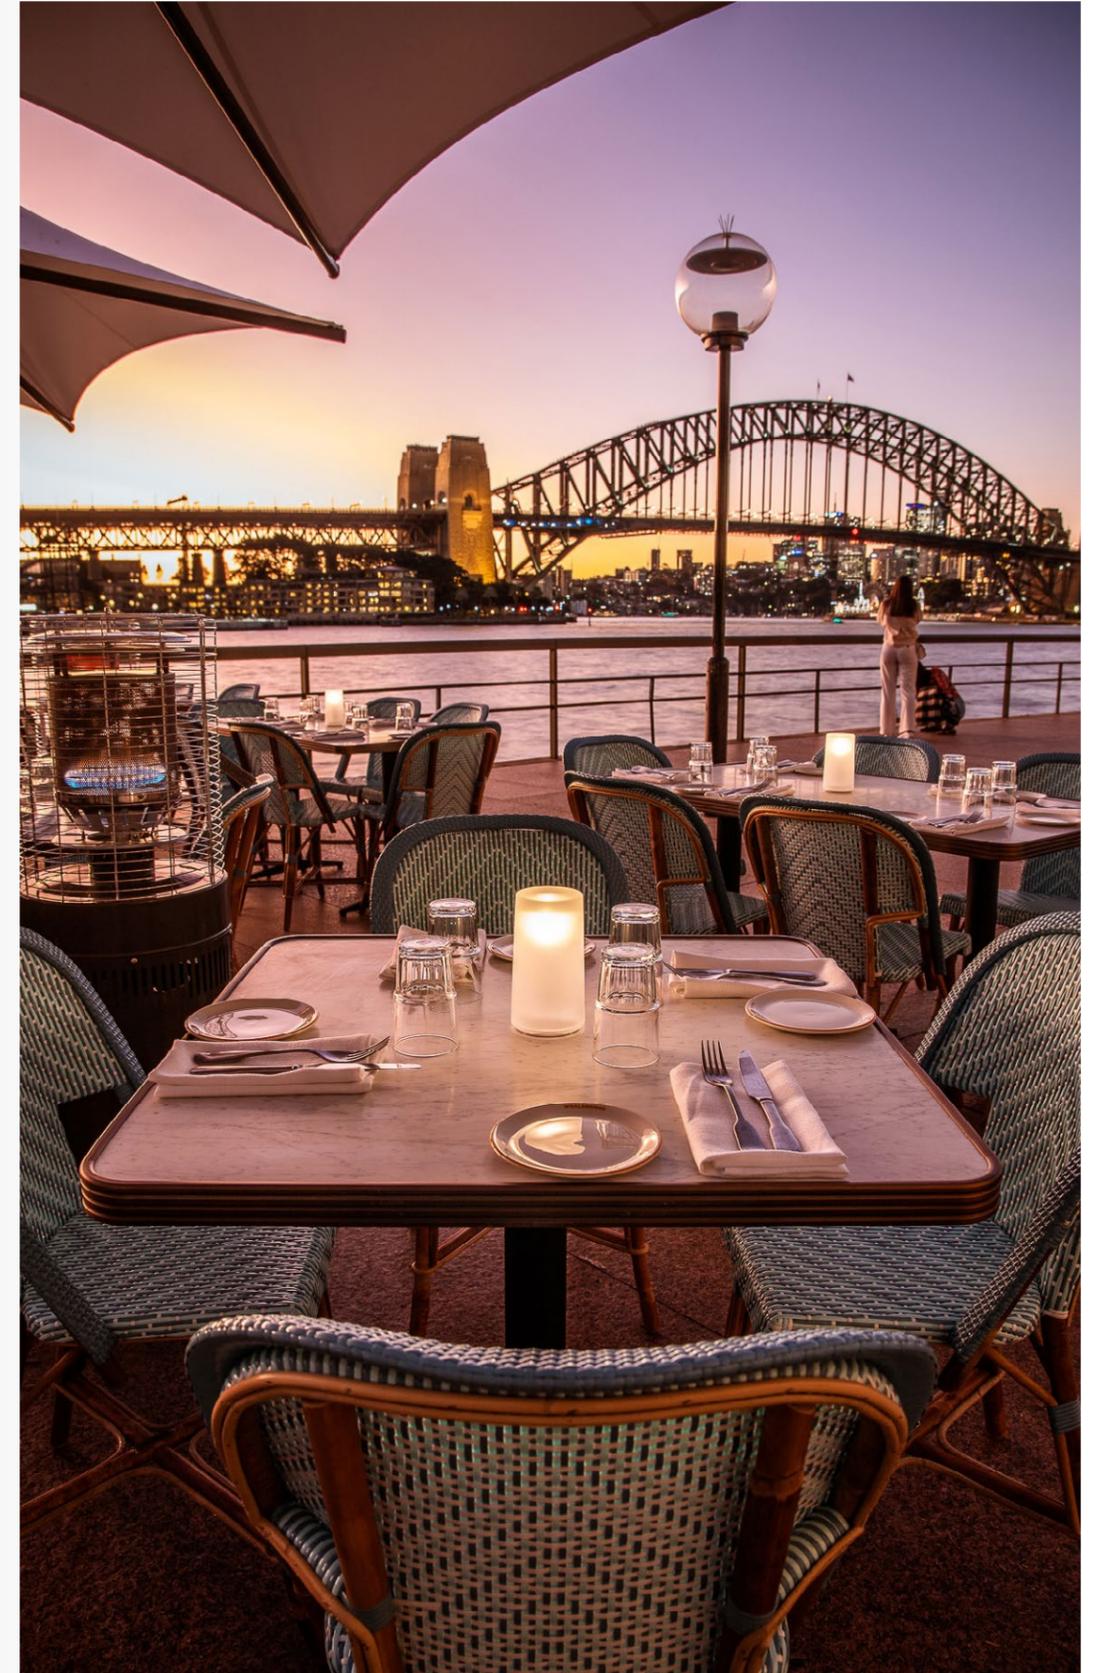

Ice Square 85 - 160mm x 85mm  
Ice Square 100 - 175mm x 110mm

### Ice Round

Pressed frosted glass diffuser.

Ice Round 85 - 160mm x 85mm  
Ice Round 100 - 175mm x 110mm

# Medusa

## Mythical beauty

Designed by Peter Ellis, David Greenway, and Ruth McDermott in 2000, the Medusa is one of the most visually striking and unique pieces in our collection. The resin diffusers were created by our longtime production partner, multidisciplinary artist Brad Allen-Waters.

Working from his studio in the Blue Mountains, Brad meticulously crafted each diffuser using a core technique that involves casting liquid synthetic resin, transforming it into a rigid polymer, and refining the surface through a multi-step process. This paves the way for the lamp's signature painted core, followed by a final polish resulting in the exceptional optical clarity and flawless finish that defines each and every Medusa.

**Medusa**  
Sculptured resin  
with enclosed reflector.  
195mm x 140mm

**Gem Square Resin**  
Hand-crafted solid  
resin diffuser.  
175mm x 115mm

**Gem Round Resin**  
Hand-crafted solid  
resin diffuser.  
180mm x 115mm

## Custom Lampshades

Our collection of lampshades offers a wide variety of options, ensuring that our customers have choices and find the perfect styles to complement their space. We feature a range of premium materials in modern, timeless, and classic styles. Alternatively, we can create a truly unique piece tailored to your preferred materials, tastes, and overall vision.

Customised lampshades are available for the Albert, Bellingen, Coeee, Elizabeth, Manhattan & Victoria collections.

## Leather Sleeves

Crafted from genuine Italian Buttero vegetable-tanned leather by Conceria Walpier, the leather sleeve for the Victoria adds a layer of character and texture to the classic design. With use, the full-grain leather will age beautifully, developing a distinctive patina. Each sleeve is meticulously hand-stitched, showcasing exceptional craftsmanship.

Designed specifically for the Victoria collection. Choose from Bordeaux, Chestnut and Olive.

# NEOZ N1

## Our 6th-gen light engine

The new NEOZ N1 is the next step in our ongoing evolution as a trailblazer in cordless lighting systems. Designed and manufactured in Sydney, Australia, the all-new N1 is the most technologically advanced, energy-efficient light engine we have ever made.

The N1 improves on our previous engine, UNO, in every category—10% brighter and 20% greener, while lasting 35% longer and recharging 1.4x faster. The upgrades don't end there.

With the new updates, we're still keeping the same design principles that NEOZ stands for—modular, flexible, serviceable, and expandable. That also means backward compatibility, ensuring that all N1-equipped lamps work with legacy lampshades, charging trays, and charging stations.

### PURITY OF LIGHT

Class-leading custom 2600k warm white LEDs module, boasting a Colour Rendering Index of 93+ and a luminous efficacy of 130+lm/W.

### DUST & WATER RESISTANCE

The NEOZ N1 enables our lamps to be IP64-rated, enhancing durability in the hospitality environment.

### QUALITY COMPONENTS

The NEOZ N1 utilises Japanese-made Panasonic lithium-ion battery cells to power custom Epistar LEDs, controlled by an STMicroelectronics 32-bit Arm Cortex microcontroller.

### ALL DAY OPERATION

Each charge provides over 17.5 hours of illumination on full brightness, and a maximum operating time of 55 hours on the lowest brightness.

### CAPACITIVE TOUCH SWITCH

More responsive and durable, the new capacitive touch switch offers 3-step dimming with long-press on/off.

### FAST & EFFICIENT CHARGING

Full charge in just 3.5 hours on our charge base, tray and station.

# Accessories

NEOZ cordless lamps are designed for busy hospitality environments, with features to support your staff throughout every shift, around the clock.

Simply place the lamp on the dock to automatically turn off and begin charging. No more fumbling with cables – the dock keeps things neat and organised. Our recharging systems are engineered to optimise the lifespan of your NEOZ lamp’s rechargeable battery, ensuring long-lasting performance.

Carry Bags  
4 / 6 Lamps

Use this carry bag to help minimise mishandling, reduce premature wear and tear, and speed up service preparation.

N1 Charging Base  
1 Lamp

Charging base made from sustainable 75% post-consumer recycled plastic. Standard accessory with retail units.

D 96mm x H 16.5mm

N1 Charging Tray  
6 Lamps

Charging and storage platform made from sustainable 75% post-consumer recycled plastic.

W 440mm x D 270mm

# Bespoke design services

With over 40 years of industrial design experience, NEOZ's in-house design team excels at crafting bespoke lighting solutions that stand out and make an impact. Collaborating closely with prominent clients, we build relationships that deepen our understanding of your unique needs, blending lamp stems and shades with various finishes and colours for a truly custom piece.

## ADAPTATION

We offer the flexibility to adapt our existing models to your space, allowing a mix-and-match approach with colours, materials, finishes, and lampshades to perfectly complement your interior. This service is rooted in our commitment to collaborative creation, working hand-in-hand with interior and lighting designers to turn initial sketches and ideas into reality.

## CREATION

Our lead designers conceptualise and create original designs tailored to your lighting specifications. We engage in creative dialogue to ensure that every design is a reflection of both NEOZ's innovative spirit and the client's distinctive style. From quick sketches to comprehensive workshops and detailed 3D models, we are dedicated to solving your needs and capturing your desired ambience.

## COLLABORATION

Illuminate your brand with NEOZ by creating special editions and signature pieces that embody your style. We combine our design capabilities with your brand identity to co-create lighting solutions that not only meet functional needs but also enhance the emotional appeal of your space, delivering memorable brand experiences.
